## **ABOUT STTP**

Machine learning is a rapidly evolving field that has seen tremendous progress in recent years. It is concerned with the development of algorithms and statistical models that enable computers to learn from data and make predictions or decisions without being explicitly programmed. This course will help faculties acquire the skills and techniques required to implement Machine Learning Models. This course will also benefit researchers who are interested in working in Data Science using Python.

This course is designed to provide the background required for engineers to meet emerging demand of Data Scientists and Machine Learning Engineers.
